## INTEROFFICE MEMORANDUM

DATE: November 27, 1995

TO: Administrative Record, Rocky Flats Environmental Technology Site, Bldg. 080

FROM: <sup>NAH</sup>N. A. Holsteen, RMRS, Sitewide Actions, Bldg. T893A, X4058

SUBJECT: SUBMITTAL OF FINAL HUMAN HEALTH RISK ASSESSMENT TECHNICAL  
MEMORANDUMS TO THE ADMINISTRATIVE RECORD (KH00003NS1A) –  
NAH-028-95

Action: None required.

This letter clarifies the intent of including the Final versions of the three Human Health Risk Assessment (HHRA) Technical Memorandums (TMs) in the Administrative Record. The Inter-Agency Agreement (1991) requires that these TMs be submitted to the regulatory agencies for review and approval (see sections VII.D.1.b and VII.1.c.). Each of these documents have been submitted to the Environmental Protection Agency and the Colorado Department of Public Health and Environment as Final, but comments or approvals have never been returned to the Department of Energy/Rocky Flats Field Office.

TM No. 2, Exposure Assessment, was originally submitted as Final in February, 1995. However, because programmatic changes were made after this submittal, a new TM 2 was prepared for a final distribution of the document.

TM No. 3, Model Description, dated December, 1994 was originally submitted as a Final in January of 1994. However, because changes were made to the technical content after the Final submittal, a new Final was completed in December of 1994.

An exception is TM No. 5, Chemicals of Concern. The Department of Energy responses to the regulatory agency comments were accepted in February of 1995. The appropriate changes are presented in the Final Chemicals of Concern TM No. 5, dated July 1995.

Any questions can be directed to Neil Holsteen at extension 4058.
